‖ **Cohob.** *Obs. Med.* Also cohoph. [Origin uncertain: it may be the root of next word, or merely a contraction of *cohobation.*

An Arabic derivation is suspected. There is a Semitic root כעב *kaʿab*, which has in Ethiopic the sense 'second', with a deriv. vb. 'to double, repeat'; this may have occurred in a vulgar Arabic dialect. The suggestion in Littré, of Arabic كهبة *kuhbat* 'dust colour mixed with black' does not explain the sense.]

'A Paracelsian term, intended to mean repetition; thus medicines given according to Cohob, signified that they were administered with unchanging perseverance' (Mayne *Expos. Lex.* 1850–60).

Cohobate (kōu·hobeit), *v. Old Chem.* [In mod.L. *cohobāre*, F. *cohober*: see prec.]

Col, obs. f. COAL, COLE, COOL; also, an apothecary's abbreviation for COLIANDER.

Col-, assimilated form of the prefix COM-, CON-, before *l*; not used in the earliest L., which had *con-*, but afterwards regular, and so in modern Romanic and Eng., as L. *conloquium*, *colloquium*; COLLOQUY. For the general signification, see COM-.

As in the case of the parallel forms *com-* and *con-*, Latin words in *coll-* were in Pr., Sp., OFr., and early ME., reduced to *col-*, as in L. *collecta*, OF. *colcite*, ME. *colet*; so *colacion*, *colege*. With the revival of learning this was altered back to *coll-*; but only one *l* is sounded, and the unaccented syllable is apt to remain (ko-) or (kŏ-); as, however, there is usually an effort to show the effect of the *l* upon the vowel, when rhetorical or distinctive stress is put on the first syllable, we here use the symbolization kǒl-, implying that the full kǒl- may be developed under stress.

Cold-finch. *Ornith.* A book-name of the Pied Fly-catcher, *Muscicapa atricapilla.*

A term which originated in some error. Expressly given by Willughby and Ray as the *German* name of a bird, of which a specimen was sent to the former, and described by him. There is no such name in German; and Willughby's description corresponds to no known bird. Its application to the Pied Fly-catcher appears to begin in 1741–3 with Edwards, who remarks, however, that Willughby's description did not agree. From him it has been handed down in books as an *English* name, and in some localities it is said to be now popularly known.

7. 'The reading from the *Collationes* or lives of the Fathers, which St. Benedict (*Regula* xlii, see 6 b.) instituted in his monasteries before compline' (*Dict. Chr. Antiq.*).

Whether the name actually originated in the *Collationes Patrum* read on these occasions does not appear certain. Already in Isidore, *a* 640, the name is simply *collatio* (*Regula S. Isidori* c. viii, 'ad audiendum in Collatione Patrem .. ad collectam conveniant..Sedentes autem omnes in Collatione tacebunt nisi,' etc. Du Cange). By Smaragdus *a* 850, and Honorius of Autun (*c* 1300), the *collatio* is explained as being itself a conference of the monks upon the passage read, 'aliis conferentibus interrogationes, conferunt alii congruas responsiones'. (See Du Cange.)

1387 TREVISA *Higden* (Rolls) VI. 121 After þe nyȝt collacioun sche wook anon to þe day. *Ibid.* VII. 373 He wolde be at þe colacioun of monkes, and made þe general confessioun wiþ oþere. 1450–1530 *Myrr. our Ladye* 165 Before Complyn ye haue a collacion, where ys redde some spyrytuall matter of gostly edyfycacion. 1482 *Monk of Evesham* vi. 8. Extended to the light repast or refection taken by the members of a monastery at close of day, after the reading or conference mentioned in 7. (Many quotations combine senses 7 and 8.) Hence, in modern R. C. usage, A light repast made in lieu of supper on fasting days.

St. Charles .. only allows a glass of wine with an ounce and a half of bread to be taken as a collation on the evening of fasting days.

9. Hence, in *gen.* use, A light meal or repast: one consisting of light viands or delicacies (*e.g.* fruit, sweets, and wine), or that has needed little preparation (often 'a cold collation'). 'A repast; a treat less than a feast' (J.).

Originally applied to a repast between ordinary meals, and still retaining much of that character.

Collect (kŏ·lekt), *sb.* Forms: 3–6 collecte, 4–6 colect, 5– collect. Also (in sense 3) 5 collete, colet, 5–6 colett(e, 6 collette, collet. [In sense 3, a. (Jerome) an assembly or meeting, (3) in med. L. in the liturgical sense (which was the first in English): f. *collectus* pa. pple. of *colligĕre* to gather together, COLLECT. (The formation is parallel to that of Romanic sbs. in *-ata*, *-ada*, *-ée*.) In OF. it had the semi-popular form *coleite* (later *coloite*) whence ME. *collete*, as well as the learned *collecte*, adapted from the L. *collecta*, familiar in ecclesiastical use. Senses 1 and 2 were prob. directly from Latin, but they were merely extensions of the earlier use of *collecte* as representing L. *collecta* in sense 3. Sense 4 is a later adaptation of the Latin.]

3. *Liturgical.* A name given to 'a comparatively short prayer, more or less condensed in form, and aiming at a single point, or at two points closely connected with each other', one or more of which, according to the occasion and season, have been used in the public worship of the Western Church from an early date. Applied particularly to the prayer, which varies with the day, week, or octave, said before the Epistle in the Mass or Eucharistic service, and in the Anglican service also in Morning and Evening Prayer, called for distinction the *Collect of the day*.

As to the origin and history of the term, we are indebted mainly to the Rev. F. E. Warren, M.A., for the following notes: the Gregorian Sacramentary (ed. Muratori, 22, 28, 116) has in one place *oratio ad collectam*, and twice simply *collecta* (to which also the first is shortened in later copies), as the title of a prayer said at one of the appointed stations where the people *collected* in order to proceed together to the church where mass was said. Here the meaning was 'a prayer for (or at) the collection or gathering'. But of even earlier date is the use, in the Gallican liturgies, of *collectio*, passing later into *collecta*, as a title of prayers, especially those of the mass, in which the sense was evidently the *collecting* or summing up in a prayer of the thought sketched out in the *Rogatio* or *bidding*, or suggested by the *capitula* for the day. It was from this source that the term, as a more or less general equivalent for *oratio*, passed into the mediæval French and English missals and breviaries (see *Paris Brev.* 1836, *Rubricæ Generales* xii; *Rituale Dunelmensis* (Surtees Soc.) *passim*; *Sarum Breviary* (ed. 1882), Index, *Sarum Missal* (Burntisl. 1861) 3; *Hereford Missal* p. xxxv; *York Missal* (Surtees) I. 169, etc.), and thence, again, into the Book of Common Prayer, where it is the title of such prayers as were taken directly from the Breviary or other Service-books of the Sarum use, and of new compositions of the same type. Neither *collecta* nor *collectio* occurs as a title, or in a rubric, in the Roman Missal or Breviary, or in any authorized Roman Service-books; but the term is popularly applied, at least in France and England, to 'the prayer in the Mass, after the Gloria and before the Epistle' (see *Catholic Dict.* s.v.; also Littré).

It does not appear that there was any original connexion between the Roman and Gallican uses of *collecta* here mentioned; but from an early period etymologizing writers tried to connect them, so as to derive the collect from both at once: see the *Micrologus* (*c* 1100) iii, of Gallican authorship, Joh. Bekethus *Divin. Offic. Explicatio* (*a* 1200) xxxvii, Durandus *Rationale Div. Off.* (*a* 1300) IV. xv. § 13; see also *Dict. of Christian Antiq.* s. v., and Canon Bright 'On the Collects' in the *Prayer-Book Commentary* (S. P. C. K.).

4. A society of scholars incorporated within, or in connexion with, a University, or otherwise formed for purposes of study or instruction:

a. *esp.* An independent self-governing corporation or society (usually founded for the maintenance of poor students) in a University, as the College of the Sorbonne in the ancient University of Paris, and the ancient colleges of Oxford and Cambridge.

b. A foundation of the same kind, outside a University. (Often combining, in its original character, the functions of a local charity for the aged and of eleemosynary education for the young.)

Such a college normally consists of a *master* (rector, provost, warden, etc.) *fellows* and *scholars*. It now usually admits students not on the foundation who pay to enjoy the advantages of common life and supervision with the scholars of the foundation, during their university or school course.

In the English Universities, the name *college* was app. not originally given to the foundations of the Earliest Period (e.g. *Merton, Balliol*), but was introduced with the new foundations of the Second Period (typified by New College, Oxf.), which were really colleges of clergy, in sense 3, but with special aims in connexion with study. With the introduction of these 'colleges' into the university system, the name spread from them to the older non-clerical foundations, and was taken in turn by those of the Third Period, the colleges of the Renascence.

Of the foundations under b, some (as those of Winchester and Eton) were originally associated with colleges in a university, others (as Gresham College, London, Dulwich College) had no such relations. When the education of the young was the object in view, such colleges have, in England, usually developed into great public schools.

Univ. Camb.* I. Introd. 14 A college, in its primitive form, is a foundation erected and endowed by private munificence, solely for the lodging and maintenance of deserving students, whose lack of means rendered them unable to pursue the University course without some extraneous assistance.

c. From the fact that in some Universities only a single college was founded or survived, in which case the university and college became co-extensive, the name has come, as in Scotland and the United States, to be interchangeable with 'university'; 'a college with university functions'.

In U. S. 'college' has been the general term, and is still usually applied to a small university (or degree-giving educational institution) having a single curriculum of study, the name 'university' being given chiefly to a few of the larger institutions, which in their organization, and division into various faculties, more resemble the universities of Europe.

Edin.* I. 70 If, as at Glasgow, there was only one College, then a College with University functions constituted the University.

d. From the relation in which the colleges in a. stand to a university, as places of residence and study recognized by it, the name has been officially extended to 'Any institution for higher education affiliated to a university': such are the various colleges affiliated to the University of London, or to Victoria University, the Queen's Colleges in Ireland, etc.

Lond.*, Such certificates as aforesaid may be presented from our College called University College, or from our College called King's College..or from, etc. 1843 *Penny Cycl.* XXVI. 25 On Nov. 28, 1836, this institution after an existence of eleven years under the name of 'the University of London' had received a royal charter of incorporation as a college, with the title of 'University College, London'. 1881 *Oxf. Univ. Calendar* (*Article*), Of affiliated Colleges. 1886 *Whitaker's Alm.* 210 *Victoria Univ.*, Colleges of the University, Owens College, Manchester, and University College, Liverpool.

e. By another extension, the name is given to institutions unconnected with a university, for instruction of a more advanced or professional kind than that given at school, such as the theological colleges of religious organizations, colleges for women, training colleges for teachers, military and naval colleges, colleges of agriculture, music, etc.

For these, *Academy* was the general name down to the 19th c. The *Royal Naval Academy* at Portsmouth was reconstituted as the *Royal Naval College* in 1806; and in 1805 was founded the *East India College, Herts*, to prepare for the service of the East India Company.

Relig. Knowl.* III. 1821 He [Pfaff] defended the collegial system against the reigning territorialism.

Collegialism (kɒ·lī·dʒiăliz'm): [f. prec. + -ISM.] A name of German origin (= *collegialismus, collegial system*) for the theory of ecclesiastical polity which maintains that the (or a) visible church is a purely voluntary association (*collegium*) formed by contract, in which the supreme authority rests with the whole body of the members; and that the civil magistrate has no other relations to the church than those which he has to any other voluntary association within his territories.

Opposed to *episcopalism* which places the supreme authority in a clerical order, and *territorialism* which ascribes it to the civil power, making the regulation of the church in any country entirely a function of the state. (Formulated under the name by Pfaff in 1742.)

Colloid (kŏ·loid), *a.* and *sb.* [f. Gr. κολλο- comb. form of κόλλα glue + -ειδης -form: see -OID.]

A. *adj.* Of the nature or appearance of glue.

1. *Path. Colloid substance, tissue, matter, corpuscles, spheres*: a homogeneous or slightly granular gelatinous substance into which the cells are changed in certain forms of degeneration of tissue (*colloid degeneration, metamorphosis*). *Colloid cancer*: a form of cancer in which colloid degeneration takes place.

1847-9 TODD *Cycl. Anat.* IX. 118/2 A form most distinct in .. colloid cancer and fibrous tumours. 1870 T. HOLMES *Syst. Surg.* (ed. 2) I. 576 A section of the tumour exhibited the simplest colloid structure. 1876 tr. *Wagner's Gen. Pathol.* 329 Colloid metamorphosis consists in the transformation of tissues into a completely homogeneous, colorless or faint yellow, dull, translucent, sometimes fluid or soft, glue-like..substance.

2. *Chem.* Applied by Graham, 1861, to describe a peculiar state of aggregation in which substances exist; opposed to *crystalloid.* Substances in the colloid state are characterized by little or no tendency to diffuse through animal membranes or vegetable parchment, do not readily crystallize, are inert in their chemical relations, but are highly changeable. So called because gelatin may be taken as the type of the class.

1861 T. GRAHAM in *Phil. Trans.* (1862) 184 *note*, Certain liquid colloid substances are capable of forming a jelly and yet still remain liquefiable by heat and soluble in water. Such is gelatine itself. 1862 H. SPENCER *First Princ.* II. xiii. (1875) § 101 Matter has two solid states, distinguished as crystalloid and colloid; of which the first is due to union of the individual atoms or molecules, and the second to the union of groups of such individual atoms or molecules. 1869 MRS. SOMERVILLE *Molec. Sc.* I. iii. 110 Solutions of.. crystalloids pass freely through colloid substances, such as parchment..and membrane, into water, though they have no pores.

3. *Min.* One of the forms in which minerals occur: see quot.

1879 RUTLEY *Study Rocks* x. 152 This condition as intermediate between the crystallised and the colloid forms of silica. 1885 GEIKIE *Geol.* II. II. ii. 62 Minerals..occur in four conditions, according to the circumstances under which they have been produced..1. Crystalline..2. Vitreous..3. Colloid, as a jelly-like though stony substance, deposited from aqueous solution. The most abundant mineral in nature which takes the colloid form is silica..4. Amorphous.

B. *sb.*

1. *Path.* The colourless or yellowish transparent jelly-like substance formed in colloid degeneration; also a similar substance found normally in the thyroid gland.

1849-52 TODD *Cycl. Anat.* IV. 1116/2 But no example of colloid in it [thymus gland] has yet been detected. 1874 JONES & SIEV. *Pathol. Anat.* 126 Colloid is related to the albuminates, and resembles mucin.

2. *Chem.* (mostly *pl.*) A colloid body or substance, as distinct from a crystalloid: see A. 2.

1861 T. GRAHAM in *Phil. Trans.* (1862) 183 [see COLLOIDAL 1]. 1869 MRS. SOMERVILLE *Molec. Sc.* I. iii. 109 Substances such as salts, sugars, etc., are much more diffusible than colloids or amorphous sticky bodies, such as gum, caramel, jellies. 1880 BASTIAN *Brain* i. 5 It is known..that certain typical colloids may, under some conditions, be converted into crystalloids.

Colloidal (kŏloi·dăl), *a.* [f. prec. + -AL.]

1. *Chem.* Of, pertaining to, or of the nature of a colloid; in the condition constituting a colloid.

1861 T. GRAHAM in *Phil. Trans.* (1862) 183 It is proposed to designate substances of this class as *colloids*, and to speak of their peculiar form of aggregation as the *colloidal condition of matter. Ibid.* 184 The colloidal is, in fact, a dynamical state of matter: the crystalloidal being the statical condition. 1876 B. W. RICHARDSON in *Gd. Words* 788 The muscle-forming food, called sometimes..because it assumes in the organism the colloidal or jelly-like state, colloidal food.

2. *Min.* = COLLOID *a.* 3.

1864 H. SPENCER *Biol.* I. 16 The mineral forms of silicic acid..are often found to have passed..from the vitreous or colloidal into the crystalline condition. 1885 GEIKIE *Geol.* II. II. ii. 62 Chalcedony, doubtless originally colloidal silica.

Hence **Colloida·lity,** the colloidal state.

1861 T. GRAHAM in *Phil. Trans.* (1862) 221 Whether the basis of colloidality may not really be this composite character of the molecule.

2. A punctuation-mark consisting of two dots placed one above the other [:] usually indicating a discontinuity of grammatical construction greater than that marked by the semicolon, but less than that marked by the period. *plur.* colons.

Its best defined use is to separate clauses which are grammatically independent and discontinuous, but between which there is an apposition or similar relation of sense. Thus it may introduce an antithetic statement, an illustration, extract, etc. But 'its use is not very exactly fixed; it was used before punctuation was refined, to mark almost any sense less than a period' (J.). It is also employed to divide prose into metrical periods for chanting.

Colonel (kū·nĕl), *sb.* Forms: *α.* 6 **coronelle, corronel,** 6–7 **coronel**(l, 7 **-all, corronell**; *β.* 6–7 **colonell,** 6–8 **collonell,** (7 **colenel**), 7–8 **collonel,** 6– **colonel.** [In 16th c. *coronel*, a. F. *coronnel* (also *coronel, couronnel*, and later *colonnel*), ad. It. *colonnello, colonello* chief commander of a regiment, f. *colonna* COLUMN: cf. *colonnello, colon(n)ella* 'a little columne or piller' in Florio; also *la compagnia colonnella*, Fr. *la compagnie colonelle*, or simply *la colonelle*, the first company of a regiment of infantry. 'The colonel was so called, because leading the little column or company at the head of the regiment' (Skeat). The early Fr. *coronel* (whence also Sp. *coronel*) was due to the dissimilation of *l–l*, common in Romanic, though popular etymology associated it with *corona*, *couronne* crown. It is still dialectal (see Littré), but was supplanted in literary use, late in 16th c., by the more etymological *colonnel*; and under this influence and that of translations of Italian military treatises *colonel* also appeared in Eng. *c* 1580. The two forms were used indifferently by Barret, Holland, Decker, and others; *coronel* was the prevailing form till 1630, but disappeared in writing *c* 1650. Of 89 quots. examined before this date, 56 have *coronel*, 33 *colonel*, thus distributed: up to 1590 *coronel* 21, *colonel* 1; 1591–1630 *cor-* 31, *col-* 22; 1631–50 *cor-* 4, *col-* 10; 1651– *cor-* 0. In 17th c. *colonell* was trisyllabic, and was often accented (in verse) on the last syllable. But by 1669 it began to be reduced in pronunciation to two syllables, *col'nel* (according to Jones *Pract. Phonography*, 1701, kʊ·lnĕl), as recorded by Dr. Johnson 1755–73, and repeated without remark by Todd 1818; in Farquhar's *Sir Harry Wildair* (1701) it appears familiarly abbreviated to *coll.* But app. the earlier *coronel* had never died out of popular use; Dr. A. J. Ellis *Eng. Pronunc.* 1074/2 cites Dyche 1710 for (kʊ·rŏnel), Buchanan 1766 for (kū·nil), Sheridan 1780 for (kū·nel) the pronunciation now established, though apparently not yet universal in 1816. Colony (kǫ·lŏni), *sb.* Also 6-7 colonie, 7 collony. [ME. *colonie*, ad. (partly through OF. *colonie*) L. *colōnia*, f. *colōn-us* tiller, farmer, cultivator, planter, settler in a new country.

L. *colōnia* had thus the senses of 'farm', 'landed estate', 'settlement', and was esp. the proper term for a public settlement of Roman citizens in a hostile or newly conquered country, where they, retaining their Roman citizenship, received lands, and acted as a garrison, being mostly formed of veteran soldiers who had served their time; hence it was applied to the place so occupied, or to towns which were raised to the same rank and privileges. Among the nine Roman *coloniæ* in Britain, were London, Bath, Chester, Lincoln. The Roman writers further used their word *colōnia* to translate Gr. *ἀποικία* a settlement of *ἄποικοι*, lit. 'people from home', *i.e.* a body of emigrants who settled abroad as an independent self-governed *πόλις* or state, unconnected with the *μητρόπολις* or mother city save by religious ties. But in later Greek it was app. felt that the *ἀποικία* was not properly equivalent to the Roman *colōnia*, which was therefore used untranslated as *κολωνία* (Acts xvi. 12). It was esp. in reference to the Roman *colōniæ* that the word made its first appearance in the mod. langs., as in 14th c. French in Bercheure (see Littré). In Eng., Wyclif used it in Acts xvi. 12, but this was app. a mere literalism, and was not continued in the 16th c. versions. Its modern application to the planting of settlements, after Roman or Greek precedents, in newly discovered lands, was made, in the 16th c., by Latin and Italian writers, whose works were rendered into English by Richard Eden.]

I. As a property or quality.

1. The quality or attribute in virtue of which objects present different appearances to the eye,

when considered with regard only to the kind of light reflected from their surfaces.

The particular colour of a body depends upon the molecular constitution of its surface, as determining the character and number of the light-vibrations which it reflects. Subjectively, colour may be viewed as the particular sensation produced by the stimulation of the optic nerve by particular light-vibrations. This sensation can also be induced by other means, such as pressure of the eye-ball, or an electric current.

XIV. § 42 Colour is the most sacred element of all visible things. 1869 TYNDALL *Notes on Light* 40 Colour is due to the extinction of certain constituents of the white light within the body, the remaining constituents which return to the eye imparting to the body its colour. 1875 JOWETT *Plato* (ed. 2) I. 274 Would you say that whiteness is colour or a colour?

2. A particular hue or tint, being one of the constituents into which white or 'colourless' light can be decomposed, the series of which constitutes the *spectrum*; also any mixture of these. In speaking of the colours of objects, *black* and *white*, in which the rays of light are respectively wholly absorbed and wholly reflected, are included.

Often used spec. of a hue or tint distinct from the prevailing tone, which may be black, white, or some positive colour. Thus in *Bot.* it is specifically used of any hue save green, 'white being regarded as a colour, and green not' (*Treas. Bot.* 1866).

Accidental colours, Complementary c.: see these words.

Colour of brightness: a yellowish colour resulting from increased illumination.

Constants of colour: numbers for the comparative measurement of the purity, brightness and hue of colours.

Ecclesiastical or *Liturgical colours*: the colours used in church-decoration or in ecclesiastical vestments.

Fundamental, Primary, or *Simple colours*: formerly, the seven colours of the spectrum, viz. red, orange, yellow, green, blue, indigo, violet; now, the three colours red, green, and violet (or, with painters, red, yellow, and blue), out of different combinations of which all the others are produced.

Secondary colours: colours resulting from the mixture of two primary colours.

Co·lour-blind, *a.* Unable to see certain colours; unable to discriminate between individual colours, or shades of colour.

(The strict meaning ought to be 'blind to colour' as a whole; but as this rarely exists (except in the case of the totally blind), the term is applied with much laxity to any constitutional inability to discriminate between colours, the common type being inability to distinguish the red and the green rays of the spectrum from each other.)

1854 MACKENZIE *Dis. Eye* (ed. 4) 948 It seems probable that yellow glasses will prove of use to colour-blind persons. 1866 HUXLEY *Phys.* ix. § 8 Such colour-blind persons..are unable to distinguish between the leaves of the cherry-tree and its fruit. 1878 BROWNING *La Saisiaz* 39 Here's my neighbour colour-blind, Eyes like mine to all appearance.

Co·lour-blindness. The condition of being colour-blind; a visual defect, consisting in inability (greater or less) to discriminate between different colours, or shades of colour.

This optical defect was first described by Dalton in 1794 (*Mem. Lit. & Phil. Soc. Manchester* V. 28), and was for a considerable time known scientifically as *Daltonism*. The accuracy of the words *colour-blind* and *colour-blindness* has often been impugned; in scientific use *achromatopsy* occurs; J. Dixon *Diseases of the Eye* (1859) 279 suggested the term *acritochromacy* (ἀκριτο-χρωμασία), with its adjective *acritochromatic.*

1854 MACKENZIE *Dis. Eye* (ed. 4) 946 Colour-blindness has been detected much oftener in males than in females. 1855 BAIN *Senses & Int.* II. ii. 3 (1864) 236 Colour-blindness has been known to exist with reference to green, but as yet, not to violet. 1876 FOSTER *Phys.* (1879) III. ii. 491 The most common form of colour-blindness is that of persons unable to distinguish green and red from each other.

Com-, *prefix* of Lat. origin. The archaic form of the preposition which in classical L. was as a separate word written *cum*; *com-* being retained in combination before the labials *b, p, m,* and before a few words beginning with vowels, as in *comes, comit-*; the *m* was assimilated before *r* as *corruptus*, in later times also before *l* as *collectus*; dropped before vowels generally, *h* and *gn-*, as *coalescĕre, coercēre, cohabitāre, cognātus*; originally, also before *n*, as *cōnātus, cōnivēre*, but in later MSS. and texts assimilated, as *connātus, connivēre*; before all other consonants *com-* was changed to CON-, q.v. But in some English derivatives, *com-* has taken the place of L. *con-* before *f*, as in *comfort.* The sense is 'together, together with, in combination or union', also 'altogether, completely', and hence *intensive.* It occurs in combinations actually formed in Latin, their derivatives, and analogical extensions. The prefix has become a living English element in the form Co-, q.v.

In Provençal, Spanish, and Old French, *com-* before *m*, was regularly reduced to *co-*, e.g. *comandement, co-mence, co-mun*, and in this form these words were originally adopted in English (cf. COL-, CON-). But with the revival of Latin learning, the *m* was again doubled in spelling in French and thence in English; this scarcely, if at all, affects the pronunciation in an unaccented syllable, except that, when the word is uttered syllabically, or a factitious stress is for the nonce put on the first syllable, this is treated as kɒm, or kɒ-, and not as kō·; it is here therefore symbolized by kɒ̄-, though in ordinary utterance this is not distinguishable from kə-, or kŏ-, *e.g.* kɒmi·t or kəmi·t.

Before *b, p*, OF. had normally *cum-*, as in *cumbatre, cumpagnie*; although this was afterwards altered back to the Latin type *com-*, the original pronunciation remained in English, where its phonetic descendant still survives in *comfort, company, compass*, etc. But the influence of the spelling in modern times has been constantly to extend the use of (kɒm-) in all such words: (kɒ·mbăt) is even now dying out before (kɒ·mbăt).

2. The ordinary term in scientific use.

As all ordinary combustion consists in the energetic combination of a body with oxygen, with evolution of heat and light, this was alone contemplated in earlier definitions of the term; but since it has been known that similar phenomena attend the combination of other elements, *e.g.* that of hydrogen and metals with chlorine, bromine, and iodine, *combustion* has been defined more generally as 'The development of light and heat accompanying chemical combination'.

Formerly, oxygen was regarded as essentially the *supporter of combustion*, the bodies which burned in it being called *combustibles*. Afterwards the former term was extended to all substances capable of forming vapours in which others can burn, as chlorine, bromine, iodine, sulphur; but since the same substance may sometimes act in both capacities, and since the vapours in question are actually consumed in the process, as truly as the so-called 'combustible', the distinction has gradually become obsolete. (Watts, etc.) Cf. COMBURENT.

b. In the sense of 'combination of a body with oxygen', the word has been applied to processes of oxidation unaccompanied by evolution of light, and not popularly considered as 'burning', such as take place in the tissues of organisms (*Internal combustion*), in decomposing organic matter, etc.

1800 *Med. Jrnl.* IV. 561 Every combination of an acid with other substances, is a process of combustion, which cannot take place without the combination of the oxygen with the combustible element. 1878 HUXLEY *Physiogr.* 80 A kind of slow combustion goes on in the body. 1882 VINES *Sachs' Bot.* 722 The decomposition of the non-nitrogenous reserve material and its combustion into carbon dioxide and water. 1882 *Syd. Come (kʌm), *v.* Pa. t. **came** (kē[1]m); pa. pple. **come** (kʌm). Forms: see below. [A common Teut. str. vb.: OE. *cuman*, pa. t. *cuóm, cóm*, pl. *cwómon, cómon*, pa. pple. *cumen, cymen* = OFris. *kuman* (*koman*), *kom, kômon, kimen*, OS. *cuman, quam, quâmun, cuman* (MDu. *comen, quam, quamen* (Flem. also *cam, camen*), *comen*; Du. *komen, kwaam, kwamen, gekomen*); OHG. *queman, coman*, (*chomen*), and *cuman*, pa. t. *quam, cham, chom*, pl. *quâmun, châmun*, pa. pple. *quoman, koman, chomen, kumen* (MHG. *komen*, pa. t. *quâm, kam, kom*, pl. *quâmen, kâmen, kômen*, pple. *komen*; mod.G. *kommen*, pa. t. *kam, kamen*, pple. *gekommen*); ON. *koma*, pa. t. *kvam, kom*, pl. *kvômom, kômom*,

pple. *komenn* (Sw. *komma, kom, kommo, kommen*, Da. *komme, kom, kommet*); Goth. *qiman*, pa. t. *qam*, pl. *qêmum*, pple. *qumans*; all:—OTeut. **kweman* and *kuman, kwam, kwēmum-, kumano-*:—Aryan **gʷem-, gʷm-*, cf. Skr. and Zend. *gam*, Gr. *βαίνω* (:—**βάνjω*:—**gʷmjo-*), L. *venio* (:—**gʷemjô*), etc.

The present tense had two stem-forms in Teutonic, viz. *kwem-* and *kum-*, repr. pre-Teutonic *gʷem-, gʷm-*, respectively; the latter being commonly considered an 'aorist-present'. Of these, Gothic shows only the former; OHG. shows both; OE. only the *kum-* stem. The OE. *cum-* has remained to the present day, being regularly represented by the current kʊm (in north. Eng. kum); the spelling *cum* was also frequent to 17th c., but the ME. scribal usage of writing *o* for *u* before *m, n, u* (*v*), introduced in 13th c. the spelling *come*, which finally prevailed: cf. *some, son, tongue, love*, etc. **This use of *o* in ME. alike for the *u* of the present and pa. pple., and the *ō* of the past, was a defect of the writing which needs to be kept in mind.**

The pa. t. had in WGer. the typical forms *kwam, kwāmun*; in OE., as in the parallel vb. *niman* to take, the long vowel of the plural was taken into the sing., giving *cuóm, cuómon*, later *cóm, cómon*, which in southern Eng. lived on through the ME. period as *cōm* (*coom, come*), *cōmen* (*cōme, coome, coom*). But just as, in late WS., *nóm, nómon*, became *nam, námon*, so in late Northumbrian *cóm, cómon* appear to have become *cam, cāmen*, which are found in the earliest specimens of northern ME. These forms were used by Wyclif, and soon afterwards drove out *com, come*, which hardly appear after 1500 in the literary language, though still widely prevalent in midland and southern dialects. In northern dialect, the pronunciation is still (kam), but in standard Eng. it has duly passed into (kēm); cf. *Cambridge*.

The pa. pple. *cumen* was used by some down to the 17th c., when it was still written *comen, com'n*. As usual, however, the final *n* began to be lost in the 13th c. (esp. in the form with prefix *ycomen, ycome*), whereby this part was at length levelled with the infinitive as *come*. Notwithstanding a strong tendency in 16–17th c. to conform it to the weak conjugation as *comed* (a form which has established itself dialectally, *e.g.* in south of Scotland), the clipt form *come* (kʊm) remains that of standard English.

In OE., umlaut forms of the present stem occurred in the normal 2 and 3 sing. *cymes(t), cymeð, cymþ*, which survived in early ME. *kimest, kimeð*; also in the pres. conj. *cyme*, and in the pa. pple. *cymen* (:—**kumino-*); in ONorthumbrian, umlaut forms were more or less frequent all through the present stem, but these do not appear in ME. (See Sievers in *Paul u. Braune's Beitr.* VIII. 81.)

The perfect tenses were originally formed with the auxiliary *be*, which is still retained to express the resulting state; in the expression of action *have* has gradually displaced *be*: see BE *v.* 14 b.]

B. Signification.

gen. An elementary intransitive verb of motion, expressing movement towards or so as to reach the speaker, or the person spoken to, or towards a point where the speaker in thought or imagination places himself, or (when he is not himself in question) towards the person who forms the subject of his narrative. It is thus often used in opposition to *go*, although the latter does not primarily involve direction, and is often used without reference thereto. *Come* is also used merely of the accomplishment of the movement, involved in *reaching* or *becoming present* at any place or point; and sometimes the entrance upon motion, involved in *issuing* from a source, is alone, or at least chiefly, thought of (cf. 11).

It is rarely *quasi-transitive* by ellipsis: see VI.

I. Of motion in space.

**of actual motion.*

1. In its most literal sense it expresses the hitherward motion of a voluntary agent.

a. To move towards, approach.

3. *Constructions.*

a. Beside the notion of *to* expressed or understood, relations of other kinds may be considered; and these sometimes become the only ones actually considered or expressed, e.g. *from* the point left, *across, along, through, by, over, under, up, down* a route followed or things passed, *with* a companion or accompaniment, *by, in* a conveyance, *for* a thing wanted, *after* a person or thing followed or sought.

1. A stage-play of a light and amusing character, with a happy conclusion to its plot. Such are the comedies of the ancient Greek and Latin writers, and of the modern stage. But in the Middle Ages the term was applied to other than dramatic compositions, the 'happy ending' being the essential part of the notion. In the English use of the term the following stages may be distinguished:

† a. Its mediæval use for a narrative poem with an agreeable ending. [Probably taken from Italian; cf. the *Divine Comedy*, the great tripartite poem of Dante, called by its author *La Commedia*, because 'in the conclusion, it is prosperous, pleasant, and desirable', and in its style 'lax and unpretending', being 'written in the vulgar tongue, in which women and children speak'.]

Lit.* IV. v. 30 This difference..between the Divine Comedy and the Paradise Lost.

† b. Applied to mystery-plays or interludes with a prosperous ending.

c. Applied to the ancient comedies, as they became known after the Renascence.

Greece* III. xviii. 81 A direct address to them [the spectators] became a prominent and almost an essential member of every comedy.

d. The modern use, arising out of b and c.

'*Roister Doister* is regarded as the transition-play from the Mysteries and Enterludes of the Middle Ages to the Comedies of Modern Times' (Arber *R. D.* Introd. 6). '"Ralph Roister Doister" is the first regular comedy in our language' (Hazlitt *O. E. P.* III. 54).

† **Comel, cumel.** *Obs. rare.* Found only in Layamon, in the dat. plural, *on* (*inna, of*) *comelan, comlen, comela, -le, cumelan*, = In (from) tents or (?) temporary coverts.

The later text actually substitutes in one place 'in teldes' =in tents; in Wace the word was generally *buschement*.

[Doubtfully conjectured to be identical with OE. *cumbol* =OS. *cumbal*, OHG. *chumpal*, ON. *kuml*, a word orig. meaning 'signum', sign, token, mark for recognition, but in OE. esp. =military sign, ensign, banner. In composition, the notion was transferred to 'war' and its circumstances, as in *cumbol-hæza*, 'war hedge', phalanx, *cumbol-hete* warlike hate, *cumbol-wiza* warrior; so that *on cumelan* in Layamon, might possibly have come to be 'in warlike array, in the ranks of war, in camp, in tents'. But the form of the word suggests that the ON. rather than the OE. was the immediate source of *cumel, comel*, and a chief sense in ON. was 'monument, memorial, cairn, or how', whence 'cairn' simply, and in mod. Icel. 'a low hay-rick'; and it has been thought possible that a sense 'temporary shelter', or even 'tent' might arise in this way.]

[OE. *cýmlíc*, f. *cýme* exquisite, fine:—WGer. *kûmi-* + *-líc*: see -LIKE, -LY[1]. OE. *cýme, cýmlic*, appear to have the sense 'beautifully constructed', 'fine', 'handsome'; but the cognate OHG. adv. *chûmo*, mod.G. *kaum*, means 'with trouble or difficulty, hardly', Fr. *à*

þeine, the MHG. adj. *kûm*, *kûme* = frail, weak, and the deriv. OHG. *chûmîg* = weak, delicate, sickly; cf. the ME. KIME weak, silly, and AKIMED. These various developments of use appear to indicate for WGer. *kûmi-* a general sense of 'delicate', as applied to workmanship or to constitution; perh. going back to the notion of 'elaborate, made with trouble or difficulty'. (See however Kluge in Paul u. Braune's *Beitr.* XI. 557.) In English, nearly the whole range of meaning during the historical period is covered by the modern colloquial use of 'nice' *i.e.* pleasant to the sight ('nice-looking'), pleasant to have to do with, pleasing to the moral sense, or æsthetical faculty, to the sensations or perceptions generally. The sense-development is also largely parallel to that of the same word. The original long vowel of *cȳmlîc* (see Sievers, *Beitr.* X. 497) was subsequently shortened by position, and *cymlîc* was thus brought into association with the *cym-* forms of *cuman* to COME, so as to be made at length *cumli*, *comly*; along with this went a gradual modification of the sense, introducing the notion of 'becoming'. It is noticeable, however, that MHG. had *komlich*, *komenlich*, and early mod.Du. *komlick*, *komelick* (Kilian), as actual derivatives of *komen*: cf. also L. *conveniens*, OF. *avenant*.]

A celestial body moving about the sun in a greatly elongated elliptical, or a parabolic orbit, and consisting (when near the sun) of a bright star-like nucleus surrounded with a misty light, and having a train of light or 'tail', sometimes of enormous length, and usually directed away from the sun.

A comet remains visible from the earth only for a short time, i.e. while it is in a part of its orbit near the sun. They have in all ages been superstitiously regarded as heralds of strange or disastrous events.

The function of the comma is to make clear the grammatical structure, and hence the sense, of the passage; one of the means by which this is effected in actual speech is a short pause; hence the comma is often inaccurately said to be merely the mark of such a pause; see quots. under b.

Command (kǒmā·nd), *v.* Forms: 3–5 **comaund(e,** 3–6 **comand(e,** 3–7 **commaund(e, -ande,** (4 **comandi, komand(e,** 5 **co(m)mawnd, -ound, -awunde),** 3– **command.** Also 3 **cumaund,** 3–5 **-and(e,** (5 **cummawunde).** *Pa. t.* and *pple.* commanded, (formerly, 4 **cumand,** komande, 4–5 comand(e, -aund(e, 5 commaunde). [ME. *coma(u)nde-n*, a. OF. *cumande-r, comande-r* (= Pr., Sp. *comandar*, It. *commandāre*) :—late L. or Romanic *commandā-re*, f. *com-* intensive + *mandāre* to commit, give in charge, enjoin.

The primary sense of L. *mandāre* (f. *mānus* hand + *dare* to give) was 'to give into any one's hand or charge', a sense retained by the ancient compound *commendāre* to COMMEND, the vowel-change in which shows its prehistoric antiquity. In late historic times, new compounds were formed on the type of the simple verb, as *demandāre, remandāre*, and in still later, *commandāre*, which also took the later sense of the simple *mandāre*, 'to order, enjoin'. *Commendāre* and *commandāre* occur indiscriminately, in both senses, in med. Latin (see DuCange). In OF. *cumander, comander* was both 'to commend' and 'to command'; and so in ME. Subsequently the former sense became obs. in both: in Fr. being taken up by the new compound *recommander*; in English for this sense *commend* was taken afresh from Latin, and *recomaund* at length assimilated to it as *recommend*.]

I. *Simple sense. trans.* To order, enjoin, bid with authority or influence. Properly said of persons, but also *fig.* of things.

The original complete construction was with accusative of the thing enjoined and dative of the person to whom the injunction is given: L. *hoc tibi mando, commendo*; Fr. *je le lui commande*. In ME. the dative was sometimes expressed by *to*, 'all thingis that I comaunde to thee', but usually without it; hence the construction was formally two objects, 'I command *thee this*', the distinction of which as indirect and direct, has tended in many cases to be lost sight of. Either object may be unexpressed, leaving the other apparently as the sole object. The original accusative is often represented by a clause or infinitive phrase, 'I command him *to come*, or *that he come*'; in which case the remaining personal object is apt to be viewed as direct, although it is historically a dative; cf. F. *commande aux esclaves de venir*, command (to) the slaves to come. Either object, if it be a sb. or pronoun, may become the subject in the passive voice; 'that which is commanded', 'he is commanded to go'.

The former conjecture is the more tenable, esp. if *com-moinis* was, as some suggest, cognate with OTeut. *ga-maini-z*, OHG. *gimeini*, OE. *gemǽne*, in same sense. The ME. repr. of the latter, IMENE, was superseded by the Fr. *comun*; the accentuation *comu·n* is found as late as the 16th c. in verse; but before the date of our earliest quots. in the 13th c., the popular form had become *co·mun*, whence *co·myn*, *co·min*, *co·men*, and the modern pronunciation. Chaucer and Gower have both; *comu·n(e* being usual at the end of a line.]

The former became the more popular in ME., and was written *co(m)mun, -on, -oun, -en, -yn, -in*, and finally like the adj., *common*; it survived in some senses down to the 18th c. But the earlier senses mostly became obs. in the 16th c., with the exception of that of 'hold converse'; and here the form *commune*, which, though less usual in ME., had never become obsolete, now came to the front, being supported by the sb. *communion*, etc. *Common* and *commune* are thus only developments of the same word; but as they became very distinct in form, and their sense-history is not quite identical, *common* having taken from the cognate sb. and adj. some senses in which *commune* is never used, they are dealt with as distinct words.]

Co·mmonplace, *sb.* and *a.* [A rendering of L. *locus communis* = Gr. κοινὸς τόπος, in Aristotle simply τόπος, explained by Cicero (Inv. II. xiv. § 47 et seq.) as a general theme or argument applicable to many particular cases. In later times, collections of such general topics were called *loci communes*. Originally two words, in senses 1–5; afterwards hyphened in senses 3–8; now usually written as one word in senses 5–8, and the closely connected adjective use.

As in similar combinations of two words each having its own accent, the stress has shifted from *co·mmon pla·ce*, to *common-pla·ce, co·mmon-pla·ce, co·mmonplace*. Walker and Smart have the second; most modern dictionaries have the third or fourth. In composition the shift of stress has generally not proceeded so far.]

Civil actions at law brought by one subject against another. Used chiefly in connexion with, or as a contraction of, *Court of Common Pleas*, the name of a court for the trial of civil causes, formerly one of the three superior courts of common law in England. This court, long seated at Westminster, was abolished in 1875; it was represented by the *Common Pleas Division* of the High Court of Justice until 1880, when that division was merged in the King's (or Queen's) Bench Division.

In earlier times the name of the court appears in the form *Common Place*; like the synonyms *Common Bench*, *Common Bank*, *Court of C. B.*, used interchangeably with it down to 16th c., this name may have originally had nothing to do with the word *pleas* (? had it any reference to the *certo loco* of the Great Charter), but some confusion between *pleas* and *place* is evident at least in the 16th c.

Commune (kŏmiū·n, kŏ·miūn), *v.* Forms: 4–6 comune, 5 comewne, 3– commune. [ME. *comune*, a. OF. *comune·r*, to make common, share, f. *comun* COMMON *a.* As mentioned under COMMON *v.*, this specially represents those forms of the OF. vb. in which the stress was upon the *u*, as 3 sing. pres. *comu·ne* (:—L. type *commūnat*); the forms with the stress on the termination, e.g. *comune·r*, (:—L. type *commūnā·re*, etc.) gave the ME. form *co·mun*, *common*. The latter was long the prevalent type in Eng., though *commu·ne* never became obsolete; and in the 16th c., when the senses under I. became mostly obsolete, and those senses which were associated with *communion* survived, this became the accepted form. But a result of the two types *co·mmon* and *commu·ne* remains in the two pronunciations *co·mmune* and *commu·ne*, of which the former is frequent in verse (Pope, Cowper, Wordsworth, Scott, Mrs. Browning; both forms are used by Shakspere, Milton, Tennyson).

(In early prose quotations it is often impossible to say how *co·mmune* was stressed. Hence some of the early quots. here placed, may belong to COMMON vb., as do all those spelt *comun*, *comen*, *comyn*, *comon*.)]

[a. F. *compas* (12th c. in Littré) 'measure, pair of compasses, circle'; in mod.F. also 'mariner's compass'; = Pr. *compas*, Sp. *compas* 'pair of compasses, measure, rule of life, pattern', Pg. *compasso* 'pair of compasses', It. *compasso* 'a compasse, a round, also a paire of compasses' (Florio); med.L. *compassus* = *circinus* pair of compasses (Du Cange). Cf. also Ger. *compass*, *kompass*, mariner's compass, formerly also gnomon, sun-dial, portable dial, Du. *kompas*, Sw. *compass*, *kompass*, Da. *compas*, Norw. *kompas*, (all) mariner's compass. (This is the exclusive sense in the Teutonic langs., as 'pair of compasses' is predominant in the Romanic.)

The history of this word and its associated verb in the Romanic langs. has not yet been determined, and it presents many points of uncertainty. It is doubtful whether the sb. is Common Romanic (the Sp. being app. from Fr. or Pr.), and as yet uncertain whether the sb. is derived from the vb., or the vb. from the sb. If the sb. was the origin, it would predicate a L. type **compassus*, f. *com-* together or intensive + ?*passus* step, pace; if the vb. was the earlier, *compassare* would be 'to pass or step together' or 'completely' (see Diez *passare*), and **compassus*, *compasso*, the action of doing so. The early history of the senses of the sb. is equally obscure: in OF., 'measure', primarily perhaps 'measure kept in walking together', 'artifice, subtilty', and 'pair of compasses', appear all to be early senses; it is at present impossible to say whether the instrument took its name from 'measuring' or from 'equal stepping'. It is probable that the sense 'circumference, circle, round' which is slightly exemplified in OF., but has received so great a development in Eng., is derived from the name of the instrument; but the converse is also possible; cf. L. *circinus* compasses, from *circa* round, etc.; also Ger. *zirkel*, (1) circle, (2) compasses. The later application to the Mariner's Compass, recognized in modern French, but chiefly developed in English and the Teut. langs., is also of obscure origin; it may easily have arisen out of the sense 'circle' or 'circuit', as showing the circle of the winds; but in German this sense appears to have been preceded by those of 'gnomon' and 'sun-dial', which may point in another direction. The Greek name of the *circinus* or compasses was διαβήτης, from διαβαίνειν to stride or walk with the legs apart, to stride, step, or pass over: it is not impossible that *compassus* and *compassare* may have been employed to render these words, and as διαβήτης also meant the gnomon of a sun-dial, it is conceivable that this indicates the way in which *compassus* came to be used for dial, and mariner's compass.

The OF. senses all appear early in ME. In the uncertainty as to the relations between these, it is impossible to arrange them in any certain order in Eng., and that adopted is merely provisional, and subject to alteration when Romanic scholars shall have ascertained the previous history of the word in their own domain.]

The mariner's compass consists essentially of three parts, the bowl or Box (*sb.*[2], sense 15), containing the Card (*sb.*[2], sense 4) on which the 32 *Points of the compass* are marked (see Point), and the Needle. According to its position or use on ship-board it is distinguished as *binnacle-*, *hanging-*, *standard*, *steering-compass*, etc.
